

Gestión de seguridad móvil AI y simplifique el monitoreo de direcciones DHCP, IP y MAC

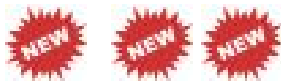

ArPro es un sistema de software de gestión de seguridad, control de recursos y control de recursos de redes empresariales.

Panel de control de red en tiempo real de ArPro

view proporciona la poderosa herramienta para administrador de red para gestionar el operación diaria de la red., ArPro ofrece

la escalabilidad hasta 1,000,000 de dispositivos

y 10,000 conmutadores para muchos clientes satisfactorios.

- 1. IBM® QRadar® Integration.**
- 2. HP® ArcSight® Integration(option)**
- 3. WinProbe, a Windows version for Probe.**
- 4. Network Switches Topology Map auto generation.**
- 5. Critical Email real-time parsing, redirecting and delivering.**
- 6. Online Messenger LINE notification integration**

NOTE: IBM® QRadar® is a Registered Trade Mark of IBM Corp.

HP® ArcSight® is a Registered Trade Mark of HP Corp.

Security Management

- Automated non-shutdown servers and virus infection equipment detection and notification for security issues.
- All event logs are encrypted to prevent from editing and deleting for auditing and security forensics & investigation.
- Automated identify switch access port and link port.
- Automated policy enforcement for higher security and operation efficiency.
- Automatically alert and notify the network broadcast packet overrun.

IP/MAC Geo-Location Management

- IP conflicts prevention with powerful IPv4 and IPv6 address management.
- Save time provisioning or reclaiming IP addresses with IP/MAC protection feature.
- New MAC blocking to prevent unauthorized equipment connecting to network for network and data access control security.
- Special privilege IP/MAC functions to protect important servers and equipment's IP/MAC to prevent service disruption.
- Automated unknown DHCP servers detection to maintain network IP system integrity.
- Automated IP scanning to detect and block unknown IP and Out-of-Bound IP to help administrator to eliminate unlawful IP.

Social Media Instant Notification System

- Critical Event Notification system

integrate many social media systems including LINE, Facebook, WhatsApp, etc..

- Unified and Real Time Event Dashboard for 3rd party security products management including Trend Micros, Fortinet, Symantec, etc..

- Detailed Event Recording to record all IP/MAC related events.

- The interactive real time Geo Map Locator and Geo-Locator solve the geographic dispersed network events management issues.

- Microsoft Active Directory Integration to leverage the existing AD user accounts.

- User friendly designed GUI for ease of use and intuitive operation.
